The training programs and job performance of the rank —and-file employees

Business, Career

Introduction

In a large enterprise, training plays a vital role in a variety of administrative practices. It is considered as one statement of the total management activities of the enterprise (Schein).

Training for the Rank and File employees primarily is intended to prove skills in order to be productive and efficient. Training likewise aims to provide the employees the knowledge required in performing the job such information regarding the organization its goal and program its relationship to other units in the company and the relationship between employees work to that of other employees provide the feeling of confidence, camaraderie, ease, andmotivationto work in the harmony towards the attainment of the organizationalgoals.

Training is also very important in enhancing the organization's competitiveness. The enhancement of employee skills to perform better job contribute much to the development of a better organizational image in the competitive market (Nadler p-12) it is important to the continued viability of the organization that workers must update their skills as technologies change.

Training is a vehicle for organizational change in that it educates employees about new corporate strategies and better ways to operate.

A review of corporateeducationand training would show how training contributes to a firm's competitive future. Given the continuously changing economy and fierce competition and rapid technological change, training is a

way to advance skills and increase knowledge of competitors especially foreign cultures and markets. A slowly growing workforce requires making the best use of the current workforce. A changing workforce due to high turnover or rapid growth requires new training needs for providing workers lacking in basic skills.

Rapid advancement intechnologyhas led to substantial organizational charges in many industries that have affected how work as done as well as the output of work. New technology has spread across the global competitors have increased with renewing focus in the use of technology to enhance product quality and to increase a firm's competitive advantage the organization approaches have required employees to increase their skills so team employees can interchange jobs thereby allowing flexible work schedules and maximum group efficiency same companies have compensated the employee not only for their performance but also for learning new skills that enhance their value to the firm.

Training should be viewed as socialization agents that help people understand and make a commitment to the organizational strategies such business decision and not employee need to do be successful in the organization.

Training has found a very important role in an organization that is why the research choose to conduct their study in Zilog company where a electronics components thus should able to determine which training program initiated in the company most effect to the job performance of the employees. This company was accessible in their goal to be one competitive firm in the

Philippines in able to succeed the goal of an organization. It was important to train the employee in order to acquire new knowledge to perform their job well.

The researchers choose the topic of the training programs and job performance of the rank and file employees at Zilog Company Sucat, Muntinlupa City because they felt that through these study employees would develop their performance in work and the organization would be more productive and profitable by the training program.
