

Self-confidence: confidence and self- assurance

[Life](#), [Emotions](#)

Self-assurance In our life, there are two words between you and your success. Than if you reached to this words, I am sure you are successful person and you can make the success one after another in anywhere. In addition I am sure you will accept knowledge and experience more than others. In this essay I am going to define these two words which called self-assurance, which basis of the successful person. Everybody have abilities and decisions also have potentials, but all of this needs confidence to be prominent.

In my assay I will discuss about concept of self-assurance, I will compare between it and vanity, and the positive effects of it... For that reason we need to compare between them, with example from reality. First one _ self-assurance _ comes from several factors which are: repeat successes, has the ability to override the difficulties and embarrassing situations and wisdom in dealing. In addition self-assurance programmed the person to accept the result whatever. For that, I am like most people's which think it is something positive. On another hand, the vanity means feeling of greatness and dust perfection.

So, the different between them is the self-assurance is estimate of possibilities available. But, the second is loss or abuse of this estimate. For example: the vanity person doesn't listen to others except him and he always talking about himself. He cannot believe that he may makes mistakes. He believes that he can be in the right place rather than others. But, the achievements are talking about the confident person. Therefore, the one of the greatest common mistakes is to say that vanity is the same self-confidence or even confuse them. That is because vanity is demolition agent

rights while confidence flying the rights. he very unfortunate to say that, the self-assurance can be grow to the point that see to its owner - in him self- he has ability on everything . Then, here turning to vanity. So, we can say there is one hair between self-assurance and vanity. So, the more human self-confidence whenever intensified that hair and approached the drop! In my opinion we can say the self-assurance is something such as motivation on the person to highlights of his abilities, decisions and potentials. Also, self-assurance almost means the esteem of self, and faith of this, can be reached this self to the success.

Because of the person respect himself so, the others will respect him. Less an example of that, When I was in elementary school. I read in one publication in my school which was published weekly contest held for the speech. I was very eager to participate in the contest so I read many articles in order to gain a range of skills to enable me to participate in the competition and won in it . Therefore, I went to the teacher responsible for the competition to ask him to add my name to the list of participants in the competition but he refuse to add my name. He said that my age didn't allowed me to join the competition.

But I was confident of my ability to participate in the contest. Finally, because of my insistence, my teacher agreed to join with the participants in the competition. And already I participated in the competition and managed to win in it within creative students. Finally , self-confidence is gaining and evolve not generate self-confidence with when it appears to the human life, those people who know you they are confidence and the can control of the

concern, and have no difficulties in dealing and coping at any time or in any place are people who have gained self-confidence.
