

# The for britain these authors formed the literature

Countries, United States

The Great Britain, founder of the United Kingdom, the empire on which the sun never sets. The Britain has conquered lands from east to west in every continent. Britain has too many benefits to world first of all the "Industrial Revolution", foundation of the United States of America, also literary outputs. These are just a few of the benefits of Britain to world. Firstly, the "Industrial Revolution". In 1700's Britain was the super power of the world "The Empire on which the sun never sets" also many technological innovations were British. They found out they need machines instead of human power because it takes much time with human power so they invented machines also they spread this revolution to all over Europe because of Britain today we use computers in every single place in our life.

There is no such thing like if Britain didn't exist we would not have computers etc. , but it is clear to see we won't be able to have that technology in our life. Secondly, The foundation of USA, Spain, France, Portugal have civilizations in America continent but none of these civilizations have gone too far in science, modernization and else. Even USA has become different country than Britain their origin belongs to the higher-ups of Britain. Every person in world once thought how it would be if I live in USA the American Dream but even USA has darker side like everything. Thirdly and maybe the most important thing is "Literary Outputs" of Britain, British authors, poets. "The Beowulf's" Poet even if we don't know the name of the writer of this poem this is one of the most important poems of Britain.

Geoffrey Chaucer is the greatest poet of the middle ages he is the author of "The Canterbury Tales". Also Sir William Shakespeare the "Romeo & Juliet,

Henry IV" and many more. His 37 plays are still performing all over the world.  
Charles Dickens, J. R. R.

Tolkien, J. K. Rowling, Agatha Christie and many more.

These people is not just important for Britain these Authors formed the  
Literature for Britain and the World To sum up, Britain started the  
Industrial Revolution, civilized the USA, British authors formed the modern  
literature. If there were no Britain probably we would not get this far in  
technology, literature. Of course the power comes with great responsibility of  
course there is dark sides of Britain as every other country, people, thing but  
we can't just ignore the benefits of Britain to our lives. God save the Queen. J
