

Before world from two catastrophic world wars then

[Countries](#), [United States](#)

Before listening to the “ American Exceptionalism” videos, I had to research the topic for my better understanding. From my understanding, I do think America is exceptional. America has more opportunities than most countries. I use to live in Germany where the place I lived, didn't have many opportunities for colleges unless I lived in a bigger city. Everyone I knew in my German school thought I was extremely lucky to live in a country where dreams come true. At 11 years old, I didn't think much of how being American was the greatest thing ever. When I moved back at the age of 15, I knew how being an American made me exceptional.

I think exceptionalism applies to the United States because it is both unique and special from our many ancestries to the growth of the United States from socioeconomic to the political characteristics. Throughout the many generations the United States has shown exceptionalism through liberty and freedom of opportunity than any other nation in the world. The United States is the world's oldest constitutional nation that the land which became the United States was settled by people seeking freedom of thought, speech, and religion and who created a country which symbolizes and values. The United States was founded by people who were committed to individual liberty and who designed a system that arranged our political freedom above governmental authority. The United States saved Europe and the world from two catastrophic world wars then saved humanity from nuclear holocaust by maintaining peace through strength during the cold war than by winning the Cold War. The United States is an electromagnet full of students from around the world, who want to come to America and attend colleges. So many people wanted to emigrate to the United States because its customary

of living has the highest and its freedom of opportunities is overflowing with possibilities.
