Supply Management play a substantial and important role in the survival and continued success of companies or business organizations, regardless of the activity, as the performance of the administration reflected positively or negatively on all the activities of the Organization financial or industrial as well as its reputation, and has resulted in the entry of supply chain management, business organizations and new responsibilities to suppliers, which impose the responsibility of the Director of the Department of supply additional burdens because this administration took play a vital and important to give a good picture of the Organization. Supply Chain Management (Historical Perspective) in the year 1980 was the development of supply chain management to express the need for the integration of the business operations of the Chairperson of the final user through indigenous suppliers indigenous people who offer products, services and information that give added value for customers and other stakeholders. The basic idea behind the supply chain management is that companies and institutions guarantee itself in the supply chain through the exchange of information with regard to the Vagaries of the market and production capacities.

If all the relevant information could reach any relevant company, every company in the supply chain has the possibility of seeking to help improve the entire supply chain rather than sub-contract based on local interests. This will lead to better planned overall production and distribution which can cut costs and give a more attractive final product leading to better sales and better overall results for the companies involved Supply chain management in UAE Dubai Ports World participated; the leading catalyst for world trade in the

work of the Conference of the Middle East iron 2017 which was held in Dubai with the participation of more than 800 industry leaders and a number of experts, managers and business executives in the iron and steel companies to discuss pressing issues affecting the steel industry in the Middle East to exit their recommendations on ways to face the challenges of this sector. He Sultan Ahmed Bin Sulayem, Chairman and chief executive of Dubai Ports World Chairman of Ports, Customs and Free Zone Corporation, the necessity of adopting innovation in the supply chains of all the partners in the chain of manufacturers and dealers and providers of logistics services and consumers calling companies to keep pace with the changes in the global market with a view to strengthening the competitiveness of the iron to ensure the sustainability of growth in the long run because innovation and cooperation with the supply chain is the key to success.

Bin Salim stressed the importance of this sector in terms of its contribution to the process of sustainable development because, as with all industrial sectors and economic activities. Bin Salim added: “ Dubai seeks to develop key industrial sectors on various tracks with a view to establishing a strong and sustainable economy based on the diversification of income sources and building the economy of the United Arab Emirates after oil.” The Chairman of the Board of Directors of Dubai Ports World to the iron on the verge of a new phase of growth and development worldwide, including calls for the solidarity of all partners in the provision of logistic services and solutions with high efficiency and flexibility, where the organization of the global iron and steel to the growth of world demand on this industry will grow by 0.9 percent to 1,555 metric tons.

Playing Jebel Ali Port and Free Zone “ Jafza mount to play a pivotal role in enabling the iron industry regionally through the port’s capacity for handling of iron and steel products at different levels, scales, as well as allocation of the iron industry in the area extends over an area of 1.1 million square meters.
