

Planning your graduation party

[Science](#), [Social Science](#)

a.) Capsule Studio - <http://www.nyeventspace.com/nyeventspace/pages/amenities.php>

The place is spacious and cozy at the same time, I think, because of the high ceilings. It fits the general ambiance I want for my party.

b.) Amarachi Lounge - <http://www.amarachi325.com/Baby-Showers.html>

I would consider this place because the ambiance is also good for my theme. Additionally, if my friends would like to sing, the place includes a sound system with the party package.

c.) MoMA PS1 - http://www.moma.org/support/support_the_museum/special_events/entertaining

The Cullman Lobby at The Museum of Modern Art is also another option. The set-up and furniture are very interesting and not intimidating.

Entertainment: My first choice is to create an audio/visual presentation of my friends and myself as students. I can't provide a link because I will create this myself. My second choice is for everyone to go to Eastville Comedy Club after dinner. I think laughter would be a good way to end the party. The third choice is a ferry ride by the East River Ferry before dinner. It would be a chance to the familiar skyline as a group.
