A little about vape mod (www.americanpreppersnetwork.com) Technology keep evolving, that's what always happens and specifically in the case of vaping industry it has evolved from traditional vape pens to vape mods. The term "mod" refers to "modified device". When traditional tobacco cigarettes evolved into electronic cigarettes, the only available option was a cig-a-like standard cigarette. Later on vapers have attached flashlight batteries to e-juice tanks while experimenting with voltage levels and flavors. This evolved form of e-cigarette with flashlights appeared to be the first vape mod. Nowadays you can buy ready to use vape mods which are available in different designs, shapes, sizes, quality and colors along with variety of batteries and tanks. TC mods, mechanical mods, e-cigarette mods and VV/VW are different forms of vape mods. Main components of e-cigarette and vape mods are same i. e. refillable tank and batteries.

Mods batteries can be dense tube or rectangular box shaped. Basic purpose behind the transformation of vape pen into vape mod was to provide a customized vaping experience where vapers can mount replaceable batteries in the vape mod and try different refilling methods. Basic function of vape mod is same like vape pen. Pressing the fire button allows you to inhale vapor. The power generated by batteries provides heat to the coil which vaporizes the e-liquid. Vapor production can be increased or decreased by using variable voltage batteries. Due to their rectangular shape and special safety feature of protecting low resistance, vape mods became far safer vaping devices as compared to vape pens. Ranging from beginner to experienced vapers, everyone can use vape mods according to their choice, convenience and ease.

Presently, vape mods are the most popular vaping devices in the vaping industry. New vapers and those who have started vaping by using vape pen always get confused about choosing between vape pen and vape mod. So let me help you out.

Choosing between vape pen and vape mod Everybody has his/her own preferences. Many vapers prefer customized mods because they like to do experiments with the flavors and vapor production and on the other hand some are satisfied with the traditional cig-a-like vape pen. Experience really matters while making the right choice. If you are a beginner than use of advanced vaping mod can be confusing and a bit tricky for you. So the better choice would be vape pen. Vaping mods are suggested for experienced vapers who want to try something new every time. Starter kits for beginners are also available in the market but normally many people start vaping with vape pen and by the passage of time they shift to vape mod.

But this is the path for those who just want to enjoy vaping. For people who want to quit smoking and choose vaping as an alternative, it is suggested to stick with vape pen so that they do not get indulged into another smoke-a-like habit. Popular vape mods It is always difficult to choose the best one when the number of available options is high. Let's find out some of the popular vape mod brands from which you can choose the one fits your desire: 1.
