Development sustained after the Second World War and the first crude exports took place in the year 1949. The fields of Maydan Mahzam and Idd Al-Shargi were discovered in the year 1960. With such a large work setup and being equipped with the latest technology, Qatar Petroleum provides its employees with the opportunity to polish their intellectual and technical skills in a highly dynamic

and challenging environment. Working with Qatar Petroleum is a privilege and a great and valuable addition to the CV in terms of experience.

Employees of Qatar Airways are offered a range of benefits and perks in addition to salary. Besides, the company fosters such a culture that makes its employees feel like a family. The company promises its employees; “ You will gain from the diverse culture, by interacting with more than one hundred and fifty nationalities in a fast-paced working environment.
