Dear Sir/Madam, REQUEST FOR A SWITCH FROM INTERNATIONAL RELATIONS TO MEDIA AND COMMUNICATION This is a request for me to be switched from the International Relations class to the Media and Communication Class. I am making this request as a result of the various problems that I have come to encounter in the International Relations classes. However, I believe that I would do much better taking the Media and Communication course because I find much more interesting and my talents lie therein. I have always envisioned a career in Media and Communication for myself and taking this course, in addition to Sociology, would ensure that I am a step closer to achieving my career goals. In addition, I have a passion for understanding the events that are taking place in the world and since I was quite young, I have often taken an interest in media as a source of information. I believe that because of my interest in the various aspects related to the course, I would do very well in Media and Communication; helping me to enhance my knowledge as well as enabling me to attain the grades that I need to achieve my career goals.

Through a combination of my knowledge in Sociology and Media, I hope to have a career that is based on an understanding of society and the effect of media on the behaviour of individuals. I would like to study the manner through which media has become influential all over the world as a result of its globalisation and the effect that media has had on the development of new marketing and advertising campaigns. I hope that my request will be considered.

Yours faithfully,
