Assignment #103-60-207 Problem Solving and Info on

theInternetMohammad Arshad (104527919)

Toronto'sGoal to

Become the Smartest City in North AmericaThe cityof Toronto is requesting

the general population for their offer in the FederalSmart Cities Challenge,

and it hopes to request groups to submit offers inlight of advancement,

enormous information and blending innovation. They needtheir citizens to

round out a review to tell them about the difficulties theyconfront when

discovering approaches to innovate, and issues identifying withnetwork,

work development, versatility, reasonable housing, and their thoughtsfor

how technology and innovation can have an important effect to life

inToronto. Talkingabout a smarter Toronto, Sidewalk Labs' CEO shared some

of his organization's ideasto build up the smart waterfront community

Quayside as they are close to takinga permanent space in Toronto. The

organization's desire is to assume the partof co-master developer with

Waterfront Toronto that incorporates building up aplan, attempting to get it

approved, and regulating the subsequent progression ofinfrastructure. They

are additionally hoping to consolidate reasonable housinginto Quayside.

Additionally, a few cases of existing activities are given to spuron citizens

within the survey and if the residents have a particularproposition they can

also submit it directly to the city. Torontois experiencing significant advances

to transform themselves into an innovationand technology center point.

Toronto can further accomplish its objective bywinning the challenge and

grabbing \$50 million to execute and develop theprojects. Good

parenting best solution to stopping kidsfrom getting addicted to phones:

expertsTwo of Apple'smajor shareholders are pushing the organization for

new features to assist limit as far as possible, harming screen time for young kids, yet experts say that there's no simple fix and the obligation will stay with parents to do the best for their children. As buyers shouldn't depend on Apple updating its products to make them less addictive for kids.

Apple has various parental controls incorporated with its products and new features are planned for the future as well. Customers can't depend on organizations to make gadgets that don't require good parenting and are without risk. To battle screen addiction, families should spend time together without technology and promote writing, sketching, and reading books. In addition, Smartphones are more appealing than TV or computer games were to kids in the most earliest of their days. It is because cell phones can go anywhere with us. It's the extent of the utilization and the omnipresence, so children can use them even when they're outside with their parents unlike television or video games. It's important that we don't see the features of "parental controls" in a device to be as a complete solution. What's significant is to give greater responsibility to children as they get older.

As observers notified that good parenting might be the only key answer to shield their kids from gazing too long at screens.
