Abstract: Nowadays, educational Institutions are paying increasing attention to the views of Student's on the involvement in learning and teaching through reviews or feedbacks.

Online Feedback System is a web application which provides base for the schools/colleges to conduct student's feedback online. The goal of the study was to develop an all in one feedback system serving both students and teachers. The system comprises of generation and analysis of teacher's feedback pages , summary, and a delivery of feedback. The system is developed for the all college students and staff members Also Students can give opinion about their faculty members.

The purpose of this system is to collect information on learning experience as well as the about teacher's performance in the class. Student must login into the system, so as to give feedback. He has to login with his name and a password. He will give the feedback to the faculty member by subject wise. He has five options to choose from excellent, very good, good, satisfactory, poor. and student has to select one of the five options about faculty in his feedback form.

Then after attempting every question has to submit his feedback with the system. This online feedback system is the perfect place to find feedback evaluated according to the requirements and it is the efficient one to get authenticated users

Introduction In today's world of online interaction, electronic education is helpful, also being The ' Feedback management System' Approaches all about taken into consideration, the student's concerns of the

level environment and teachers. In the existing system, students can give feedback about the lecturers manually on a paper where there are sets of well-defined questions. After giving feedback, papers are collected by the Staff and the overall marks for each subject and each lecturer is calculated. After that those all summary of grades is viewed by the head of the department which is given by the faculty.

But by this process student can give feedback in online system which saves time and also once the feedback will be submitted it can't be changed. We have developed faculty feedback system to provide feedback in an easy and consistent manner to the college HOD or principal. We call it faculty feedback system which delivers via student staff interface as online system which is acting as Service Provider. The primary focus of this project is to get familiar to VB. NET framework and C# coding's. visual studio to provide a featured GUI which will be used 2.

Project Concept & Product (Details of Product) Here in this web-app for issuing the feedback about System which interaction as web system system we faculty by students on HODs. This project has four kinds of users Student, teachers, head of department and Admin. The student can give feedback in online system provided by staff. Students and can give feedback about the lecturers. Lecturers can give feedback for peer faculty members and also self, Head of the department can give feedback for lecturers These reports will be checked by the head of department .

He can view overall marks and grades obtained to the teacher and give this report to the principal and he can further give counseling to the college staffs compared to the old or manual system, this online system is very easy to use and due to user-friendly interface it is easy to understand too. Paper ID: ART201646892 2187 feedback analysis of students and staffs. In the proposed system, security is included, the result of which the feedback is only visible to (Administrator or user with special privilege). Online feedback is an integral feature of evaluation of effective & efficient learning & teaching practices.
