

Clinical experience

[Sociology](#)

Born on 7 September 1959, I was exposed to the field of dentistry early on through my father, who is a dentist himself. I attended the Gymnasium Jacob-Grimm-Schule in Rotenberg an der Fulda for my early education in 1969 where I graduated with a grade point average of 1.7 ten years later. This gave me the chance to enter a university preparatory school in the same year where my formal education in dentistry began, studying as a dental technician. Upon completing my course, I entered the prestigious dental clinic in the University of Geissen. During my stay in the university, I was fortunate to have been given the chance to attend a six-week formulation at the Oral-Facial Surgery Department in the General Hospital Ochsenzoll in Hamburg under the esteemed professor, Dr. Metz. A year later in 1985, I graduated from the University of Geissen with a degree in (degree...)

After graduation, my professional experience in the field of dentistry began when I served under the army in 1985. During my service, I earned the rank of Captain before honorably leaving the service. In 1986, I began working as an assistant doctor in the dental office of Dr. Baunatal Baltzer. During this time, I expanded my knowledge in the field, taking advantage of the chance to gain as much experience and insights under Dr. Baltzer's tutelage, while at the same time learning the ins and outs of the practice. A year later, I began my own practice; setting up my own dental office in 1987 located in my hometown Rotenberg an der Fulda.

In the past years, I was able to build a successful practice, gaining the trust and respect not only of my clients, but of the larger community as well, where I became the Chairman of the local dentists association in my district (name of association) in (year). I also expanded my dental practice to include <https://assignbuster.com/clinical-experience/>

a staff of fifteen employees and one assistant dentist where I provide all services under family dentistry, except for orthodontics. Consequently, my office grew to a size that is double of an ordinary dental office in Germany by 2003.

Aside from my personal achievements, however, I firmly believe in the value of constant improvement. Thus, I attended numerous post-graduate seminars and conventions including the (name of seminar) in Hessen where I was also chosen to be a delegate in (year). I also participated in numerous continuous education programs in implant surgery, paradontistics, prosthodontics, and endodontics. Furthermore, I encouraged improvements in the dental practice of Rotenberg an der Fulda as whole through participating in a local study group, where members work to improve the quality of dental services and treatment within the locale.

Despite my very successful dental career in my hometown, I believe it is about time to begin a new chapter in my dental career and embark overseas. Thus, I sold my office in Germany and began working part-time in a clinic for aesthetic dentistry in Netherlands where I perform full ceramic rehabilitations. Soon after, I began processing my documents for immigration to the United States where I plan to repeat the success I achieved in Germany, beginning with further expanding my knowledge of dentistry through the successful post-graduate training program offered by your good school in Florida.
