RELATED WORKS: 2. 1 Disadvantages of old system As we know the manual process is quite tedious, time-consuming, less accurate in comparison to computerized processing. Obviously, the present system is not an exception consultant encountering all the above problems. · Time

Consuming. · It is very tedious. · All information is not placed separately. · Lot of paperwork.

· Slow data processing, not the user-friendly environment. · It is difficult to find records due to file management system. 2. 2 Advantages of new system In the new computerized system, I tried to give these facilities.

· Manually system changes into the computerized system. · Friendly user interface. · Time-saving.

Paper Saving · Connecting to the database so we use a different type of queries, data report. Give facility of different type of inquiry · Formatted data. · Data are easily to modifying. 2.

3 IMPORTANCE OF PROBLEM · To computerize all details regarding importer, customer details & pharmacy details. · To automate the process of ward entries. · To maintain records effectively. · To manage a current store of pharmacy and availability. · The project has information regarding the importer details, customer · Details, billing details and sales details.

· This project includes modules such as 1) Staff Details Personnel Details Gives special authentication to each user Monitor staff actions

 pharmacymanagement system: 1) Pharmacy Management Module: Used  
 formanaging the Pharmacy details. 2) Pharmacy Module: Used for  
 managing the details of Pharmacy 3) Sells Module Used for managing the  
 detailsof Sells 4) Medicines Management Module: Used formanaging the  
 information and details of the Medicines. 5) Stocks Module \_ Used to  
 manage ng theStocks details 6) Company Module: Used for managing  
 theCompany information 7) Login Module. Used for managing the  
 logindetails 8) Users Module Used to manage ng the usersof the system2.  
 5 Utilization of pharmacy managementsystem: It mayhelp collecting perfect  
 management in details.

In a very short time, thecollection will be obvious, simple and sensible. It will  
 help a person to knowthe Management of passed year perfectly and vividly.  
 It also helps in currentall works relative to Pharmacy Management System. It  
 will be also reduced thecost of collecting the management and collection  
 procedure will go on smoothly.

My project aims at Business processautomation; I have tried to computerize  
 various processes of PharmacyManagement System. In the computer system  
 the person has to fill the variousforms number of copies of the forms can be  
 easily generated at a time. Additionally, it's not necessary to create the  
 manifest but we can directly print it, whichsaves our time. · To assist the

staff and capturing the effort spent on their respective working areas.

- To utilize resources in an efficient manner by increasing their productivity through automation.

- The system generates types of information that can be used for various purposes.
  - It satisfies the user requirement
  - Be easy to understand by the user and operator
  - Be easy to operate
  - Have a good user interface
  - Be expandable
  - Delivered on schedule within the budget

2.6 Functionalities provided by Pharmacy Management System are as follows;

- Provides the searching facilities based on various factors. Such as Pharmacy, Stocks, Company, Pharmacy.

- Pharmacy Management System also manages the Sells details online
- Company details, Pharmacy details, Pharmacy.

- It tracks all the information of Medicines, Sells, Company etc
- Manage the information on Medicines

- Shows the information and description of the Pharmacy, Stocks
- To increase efficiency of managing the Pharmacy, Medicines
- It deals with monitoring the information and transactions of Company.

- Manage the information of Pharmacy
- Editing, adding and updating of Records is improved which results in proper resource management of Pharmacy data.

- Manage the information of company

- Integration of all records of Pharmacy
- Reports of Pharmacy

- Pharmacy Management System: It generates the report on Pharmacy, Medicines, Sells
- Provide filter reports on Stocks, Company, Pharmacy
- You

- can easily export PDF for the Pharmacy, Sells, Company
- Application also

- provides excel export for Medicines, Stocks, Pharmacy
- You can also

- export the report into CSV format for Pharmacy, Medicines, Pharmacy

PROPOSED METHODOLOGY: When a student has an idea for a Graduation project to be graduate from university, how does that idea become reality? How do they go about making it happen? I selected the systems-development life cycle (SDLC). 1.

System Analysis 2. System Design 3. Implementation 4. Testing 3. 1

System Analysis To create this system, it needs several of tools and environment is used for developing the proposed of the project. The Programming that software is created by programming is the process of making a set of order and logical instructions for a digital device to follow using a programming language. The functional of programming is usually called coding in order to the syntax of a programming language is not in a form that all can understand it is in code. The process of developing a software is not always easy, sitting down and writing some code.
