Discourage C. General C. Grateful B. Argument D.

Politics Question 13. A. Assure D. Regrets Question 14. A.

Enjoyment Question 15. A. Accommodate C. Arrival B. Appreciate D. C.

Accessory D. Competition Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions The Native American peoples of the north Pacific Coast created a highly complex maritime culture as they invented modes of production unique to their special environment.

In addition to their biophysicist technical culture, they also attained one of the most complex social organizations of any nonagricultural people in the world. Division of labor similar to that of the hunting peoples in the interior and among foraging peoples throughout the world, the men did most of the fishing, and the women processed the catch. Women also specialized in the gathering of the abundant shellfish that lived closer to shore. They collected oysters, crabs, sea urchins, mussels, abalone, and clams, which they could gather while remaining close to their children.

The maritime life harvested by the women not only provided food, but also supplied more of the raw materials for making tools than did fish gathered by the men. Of particular importance for the native tool than did the fish gathered by the men. Of particular made from the larger mussel shells, and a variety of cutting edges that could be made from other marine shells. The women used their tools to process all of the fish and marine mammals brought in by the men. They cleaned the fish, and dried vast quantities often for the winter.

They sun-dried fish when practical, but in the rainy climate of the coastal area they also used smokehouses to preserve tons of fish and other seafood

annually. Each product had its own peculiar characteristics that demanded a particular way of cutting or drying the meat, and each task required its own cutting blades and other utensils. After drying the fish, the women pounded some of them into fish meal, which was an easily transported food used in soups, stews, or other dishes to provide protein and thickening in the absence of fresh fish or while on long trips.

The women also made a cheese-like substance from a mixture of fish and roe by aging it in storehouses or by running it in wooden boxes or pits lined with rocks and tree leaves. Question 16.
