

I majored in
accounting from
central queensland

**ASSIGN
BUSTER**

I did my 4 years Bachelors from IQRA University, one of the top ten Universities in all of Pakistan. I majored in accounting from Central Queensland University (CQU), a university with a reputation for excellence in terms of its business programs and it also features in top 20 universities of Melbourne. My academic experiences influenced upon me the significance of accounting in the modern business world. As I had a passion for accounting, it became cleared to me that the pursuit of postgraduate education in accounting, ideally in the Australia, is the next best thing in my overall career progress. Many exceptional intellectuals from my country have studied overseas to enhance their skills with overseas lecturers and classmates, and this has been contributory to the progress of my country's economy.

I hope to follow the trend, widening my global perspective, improving my language skills, and strengthen my knowledge of accounting. I joined couple of organizations after my graduate studies, in which I got valuable experience. Perhaps the most valuable experience which I got from was Computer Information Services as an Accounts Officer. My job responsibilities includes Preparing, examining, and analyzing accounting records, financial statements, assist manager in preparation of monthly financial reports, calculate ratios and provide management with analysis on forecasted reports.

This experience proved to be as a learning curve in my career, and I expect that the professional experience which I acquired will be very useful when pursuing further studies. As the above shows, I am highly inspired and determined in pursuing my strategic program in Australia. By studying in this program, I hope to extend my vision and improve my professional skills.

After completion of this program, I plan to return to Pakistan and work for one of the leading multinational accounting firms as an accounting and management professional capable of dealing with a broad range of people, companies, and financial situations. With a master's degree and strategic & leadership program from Australia, I will have an advantage over my competitors in the professional world who will only have a bachelors from Pakistan. I expect to have a long and skill full career in this field and assist wide range of businesses. In this way, I hope to progress to the general development of my country's economy and become an accounting professional in my field.
