Chapter 1 Welcome to College Attitudes and Actions for Success What does college offer and expect of you The Culture of College Independent learning learn with freedom and independence remember deadlines, keep up with reading, attend class, complete projects without much guidance Fast Pace college courses move faster can energize and motivate you Challenging work more words per page, higher level terminology, more abstract ideas opportunity to learn and grow More out-of-class time to manage manage your schedule make use of days off and days when classes end early/start late for study time Diverse Culture can be challenging peers may differ in age, ethnicity, values, etc.

Higher-level thinking more than summarizing interpret, evaluate, generate new ideas, and apply what you already know Connect with People Faculty and Staff and Mentors faculty are among the most valuable can help you learn more and more efficiently underused mentor: a wise and trusted guide can be part of an organized program can be found more casually takes interest in you and your growth Connect with Technology and Written Resources Class and Course Information Syllabus Calendar key dates Spot time crunches Get sense of how much time should be set aside for studying Student Handbook and Course Catalog Technology Get started right away Use the system Stay on task What thinking skills can help you achieve your goals The Three Thinking Skills Critical Thinking Engaging with information through asking questions Creative Thinking Generating new and different ideas and approaches to problems, and often, viewing the world in ways that disregard convention Practical Thinking Applying what you've learned How Thinking Skills Move You Toward Your Goals Use your thinking power to work towards

your goals Think critically Think creatively Think practically How can a “ growth mindset” help you succeed Be Responsible...
