

Hudson river

**ASSIGN
BUSTER**

1. I believe that mission is living up to its ideals as best as it can, however as with any mission ment, it is truly an ideal to reach. I feel it is important for this organization to continue its work, and keep preserving the integrity of the Hudson River. The river is of major historical important, and their duty to protect it is very important.

2. I believe the mission should also expand to include other major waterways, and make sure to give these the success it has seen with the Hudson River. Also, the organization needs to make sure it is keeping with all of its mission statement, and not just parts. One of the most important parts however is keeping the River clean, and I think it needs to make sure it does a good job of keeping it clean and keeping the public alert of safety and contamination issues.

3. It built the first environmental classroom on the lake available to all children, helped pass the Clean water Act, made the first toxic-pipe discharge watch in the Hudson valley, has support the passage of various other environmental laws throughout New York State, first to start a huge battle with GE to remove toxic chemical from the river, as well as engaging the help of outreach programs to help their cause.

4. nope, I haven't.
