Technology at workplace

Technology

Their so many ways technology can distract employees at work. The use of social networks at work can cause so much distraction and it affects the productivity of employees. Some companies have decided to block access to specific websites like Backbone, Twitter and Youth, because of the unlimited distraction they cause. Other business technologies which cause distraction at work include smartness, computers and virtual meeting applications like Keep.

Makes employees lazy: Since most tasks are automated by technology, many employees become lazy at work; technology kills their creatively and skills. Simple tasks like calculating sales and tracking inventory are being done with computers, so you will find that employees do not put their brains at work, they can't solve high-end business problems because a computer or software will do it with no challenge. Affects Workplace Relationships: Employees communicate via cell phones, text messages, email or virtual video conferencing tools. This type of communication technology eliminates face-to-face communication.

Interpersonal communications are Important In building workplace relationships because employees will get a chance to know each other In person, sometimes they can even share non-work related information, this type of interaction is killed by communication technology tools. Employees become more reserved and self-centered; they get buried into their work which can be of great harm to a business. It's Risky: Though we Like the advantages that come with technology at work, It also tends to be sky, especially when It comes to data security.

All employees In Important decision making positions will need access to private business Information; this can pose as a threat, because it can be very difficult to monitor the usage and privacy of this information. Many employees come with flash drives at work, so they can transfer critical business information and use it for their own personal gains Advantages of Technology in the Workplace: Improves communication: Many businesses are using various business communication technologies to change he way their employees Interact and communicate while at work.

Employees can use various communication tools to Interact or exchange Information at work. For example, employees from different departments in a company can use text messaging services or video conferencing tools like Keep to share and exchange information. Virtual communication tools like Keep can be used to share screens and this can help employees to share projects while in different departments, the same application can be used to support group decision making. Encourages Innovation

Employees can use different business technologies to create innovative business ideas which can be used in business growth and expansion. Many companies create technological challenges and reward employees who come up with creative ideas using technology. Employees can use internet technology to innovate ways of promoting a business online. Social enterprise networks like Yammer. Com can be used by employees to socialize and interact with other creative employees from different organizations, this interaction will result into information exchange and it also encourages brain storming on various work related issues.

Saves Time: Technology can be used to automate various tasks at work; this automation will guarantee efficiency and will also increase on production at work. The use of computers to accomplish specific tasks at work creates room of making corrections on instant and it also reduces on human errors. Using databases to capture and store information can facilitate quick decision making at work. Employees can easily access business information via one single database; this information can be edited and paved for later use.

Use of internal networks at the workplace can help in sharing of gadgets like printers and scanners, so employees do not have to move to different departments to share technological tools. Creates Mobility: The use of internet and computers to work has eliminated space and time boundaries. Employees can work from anywhere at any time, this mobility makes employees stay in control of their Jobs. Technological tools like virtual meeting applications save us time, we don't have to be in meetings physically yet information and data will be shared in real-time.
