

# Looking for alaska reaction paper assignment

**ASSIGN  
BUSTER**

At some point, you just pull off the Bandit, and it hurts, but then it's over and you're relieved. " A quote in this marvelous book that really gets you thinking about the very little thing in life that's ever gotten you down. Looking for Alaska is such an inspiring novel, with heart wrenching words, and a splendid storyline. This novel has so many different things going on involving the themes, motifs, and symbols that really has an interesting aspects to them. John

Green certainly is very invested in his writing, because it has such intricate details that makes the entire story so much more enjoyable. Possibly one of my favorite things about this novel is how the characters are shown to the reader. Just like most novels out there, each character has their own personalities that the reader adapts to. Looking for Alaska has a different spin on that, and that's something that makes it truly special. Even though I adore all the characters, I take a strong connection towards the girl hinted in the title herself, Alaska Young.

Alaska Young is such an unpredictable character. She's wild in all forms, she's moody, and she's just simply beautiful. She captures Miles' attention and eventually his heart. Miles is essentially the protagonist in this novel. The themes in this novel are things that are interesting enough to keep you engaged throughout the story. The major themes in this novel that I noticed were guilt, silverberry and death. The aspect of guilt is present all through the book in very mysterious ways. It begins with Miles' guilt of leaving his parents behind.
