

Lesson 3

**ASSIGN
BUSTER**

Intellectual property An idea, invention, or process that derives from the work of the mind or intellect. Copyright Covers published and unpublished literary, scientific, and artistic works, provided that such works are in a tangible or material form. Trademarks Cover symbols, a word or words, and names used by a particular company to represent the company or a product. Whereas a copyright covers an entire work, a trademark represents and protects a brand. Patents Protect inventions and processes and exclude others from trying to market, produce, and sell them for a period of time. Fair use Allows people to make a single copy of a periodical article or select portions of a book for personal study or research use, like for academic purposes.

Plagiarism Using another person's ideas or finished work as your own without giving credit for the source. It includes copying or paraphrasing, and it's a violation of academic honesty and integrity. False

True or False?

Images on the Web are " public domain" and copyright-free.

False

True or False?

It's okay to use materials without referencing them as long as they're paraphrased in your own words.
