

Assignment tamplate essay

Business

**ASSIGN
BUSTER**

Here is an example to get you started on the Week 2 Homework: 1. State the administrative agency which controls the regulation. Explain why this agency and your proposed regulation interests you (briefly). Will this proposed regulation affect you or the business in which you are working? If so, how? Submit a copy of the proposed regulation along with your responses to these five questions. The proposed regulation can be submitted as either a separate Word document (.doc) or Adobe file (.pdf).

This means you will submit two attachments to the Week 2 Dropbox: (1) a Word doc with the questions and your answers and (2) a copy of the proposed regulation you used for this assignment. (10 points) Illinois Department of Regulation – I am a hunter so this interests me and will impact me with the new deer hunting regulations. This will affect me peripherally as the cost of the permits have increased. 2. Describe the proposal/change. (10 points) The proposal increases the fee for late season deer permits and repeals the “group hunting” permit.

3. Write the public comment which you would submit to this proposal. If the proposed regulation deadline has already passed, write the comment you would have submitted. Explain briefly what you wish to accomplish with your comment.

(10 points) My comment is that group hunts were beneficial to the family who hunts together and I’m not sure why they are being repealed. Further, hunting is expensive and a set of permits for a family of 6 is now \$105, instead of \$90. Hunting deer is a benefit to the state of IL as there are over 45, 000 car accidents due to deer and hunting is the only control mechanism

the state uses. I wish to have them reconsider this new rule. 4. Provide the “deadline” by which the public comment must be made. (If the date has already passed, please provide when the deadline was).

(5 points) This expires on 10/2/10. 5. a.

Once you have submitted your comment, what will you be legally entitled to do later in the promulgation process (if you should choose to do so)? (See the textbook’s discussion of the Administrative Procedure Act.) (will provide after homework due) b. If the proposal passes, identify and explain the five legal theories you could use in an attempt to have the regulation declared invalid and overturned in court.

(will provide after homework due) c. Which of these challenges would be the best way to challenge the regulation you selected for this assignment if you wanted to have the regulation overturned and why? (will provide after homework due) Answer all of these questions for #5 even if you are in favor of your proposed regulation. The response to question 5 should be a minimum of 2-3 paragraphs long. (15 points)
