

Algebra chapter 6 and 7 vocabulary

**ASSIGN
BUSTER**

Break-even pointThe point where the cost and income functions are equal.

System of Linear EquationsWhen two or more equations define a relationship between quantities. ONALGEBRA CHAPTER 6 AND 7 VOCABULARY

SPECIFICALLY FOR YOU FOR ONLY \$13.90/PAGE Order Now Substitution

MethodA process of solving a system of equations by substituting a variable

in one equation with an equivalent expression. **Consistent Systems**Systems

that have one or many solutions. **Inconsistent Systems**Systems with no

solutions. **Linear Combinations Method**A process of solving a system of

equations by adding two equations together, resulting in an equation with

one variable. **Half-plane**The graph of a linear inequality **Constraints**Another

name for the inequalities in a system of inequalities **Solution to a System of**

Linear InequalitiesThe intersection of the solutions to each inequality **Linear**

ProgrammingA branch of mathematics that determines the maximum and

minimum value of linear expressions on a region produced by a system of

linear inequalities
