One of the objectives of the research is to identify the number of dark tourism sites in Prague. The tables below best suit the objective. The information identifies 5 centers in the Dark Tourism Site as:

Charles Bridge

Jewish Quarter

Museums

Old Town

Prague Castle

The second objective of the research was to identify the historical aspects related to existence of these sites. Table 10 reveals that the Dark Tourism Centre has been used for various historical events such as

Heritage

Culture

Short/City break

European Tour

Stag or Hen Party

VFR

Even so, the largest numbers of visitors have been using it for Short City Breaks.

The third objective was to identify the distribution of these centers in the town. Table 12 discusses the awareness of the residents about the Dark Tourism sites. The low level of awareness indicates that the distribution is not equal hence there is a large number of people who are not aware of the centers.

The fourth objective was to find out the origins of the tourists to these sites.

The impact that the Dark tourism has had on the reputation of Prague

<https://assignbuster.com/explanation-of-spss-tables/>

indicates that centers have been working for a considerable duration, creating a possibility of the tourism having originated locally.

The factors identified in the objectives indicate that about the demand for the Old Town is more than other areas in the dark tourism industry in Prague. The demand for other areas is low because of the lack of awareness.
