Think long and hard in order to better be able to discern where you are trying to take the topic argumentatively. Do your homework - There have undoubtedly been others who have argued for or against the topic that you chose who may have done it years prior to you even thinking about it. Take time out to research how your predecessors argued their stance. Know your opposition - Every argumentative topic has a pro side and an opposing side. The best possible strategy that you can employ when writing the article is to know your opponent's stance on the issue. Technology is being used increasingly in the classroom and some people believe that educators will become redundant. I somewhat disagree that teachers will be replaced by machines.

The main reason why I think that teachers are essential is because they encourage and discipline students. Many people find it difficult to be interested in learning new things. Therefore educators are needed to make classes more interesting and stimulate students' desires for learning. Also, in the case of young people, teachers often need to force students to learn

through the use of punishments. Another reason why teachers are needed is because they can teach young people important skills and values. This is because educators serve as role models to their students and teach them how to appropriately interact with their peers.

Therefore, if people only learn using machines they will lose the opportunity to learn important social skills and values. However, studying over the internet certainly offers a lot of convenience. First, we are able to study in the comfort of our own homes, without the need to commute to school. Second, we can choose to study at any time we like even in the middle of the night. In summary, I somewhat disagree that machines can replace teachers. This is because teachers can encourage students to learn and teach them how to interact with other people. Although, computers do offer the ability for people to learn anywhere at any time.
