

Is technology a blessing or a curse

Technology

Nowadays, all people in the society living in urban areas are hooked in technology. The daily use of technology in their everyday life had been their daily routine, usage of devices like Computer, mobile phone and other gadgets that had been discovered. Unfortunately, people can hardly control their self on being hooked in technology these days. Being Hooked in technology have become bad Habit on a person. It brings harm like radiation, radiation is one of the known causes of sickness that a person encounter on excessive usage of gadgets.

Apparently , depending on technology as technology might one day collapse, crippling the society. Due to over dependence In technology, creativity is hindered: people becomes like a “ robot” because without technology doing a lot of things in the day to day life becomes too hard. But on the other side technology has provided a lot of good attributes. Discovering and making gadgets like mobile phones, it help to communicate a person in a place. Airplanes and trains as a transportation, to transport a person to a place to another much faster.

Internet and computer had also made to contain information needed by the society. These are examples that technology has benefited people to make life easier, but Technology only becomes a disadvantage when we use it irresponsibly. In general technology is a blessing, because It help us to make our daily life easier than before. Technology also brings progression in human society and give improvement on our living conditions. Technology may depend on a person on how technology will be used. So use technology wisely!
