HISTORY THAT I’VE RESEARCHED:

Philippine literary production during the American Period in the Philippines was started by two significant developments in education and culture. Americans were the one who introduced the public school system here in the Philippines. They use of English as medium of instruction in all levels of education in public schools. Free public education made knowledge and information accessible to a greater number of Filipinos. Those who availed of this education through college were able to improve their social status and joined a good number of educated masses who became part of the country’s middle class. The use of English as medium of instruction introduced Filipinos to Anglo-American modes of thought, culture and life ways that would be embedded not only in the literature produced but also in the psyche of the country’s educated class. It was this educated class that would be the wellspring of a vibrant Philippine Literature in English.

Philippines Literature is divided into three timeframes:

> Here, the writers had mastered the proper English literature-time favorites love and youth persisted.
