

July 17, 2012

July 17, 2012 BACKGROUND OF THE STUDY - I chose this project because a Fabric conditioner mosquito repellent made up from natural mosquito repelling plant which is Oregano that will be made as oil that will remove the health problems caused by commercial mosquito repellents and other fabric conditioner mosquito repellent. Oregano and lemongrass are easy to find and very common and also if this project succeed this can be profitable for business and can encourage others to look for other use of our country's natural resources. STATEMENT OF THE PROBLEM - Can the oregano oil and Downy fabric conditioner be an alternative fabric conditioner repellent? - Will the combination of Downy fabric conditioner be appealing to other even though more of us don't like the scent of oregano? - Will the Oregano oil as the natural mosquito repellent last longer and still be effective even though it will be mix to Downy fabric conditioner? OBJECTIVES - To make an oregano oil that will be mix to Downy fabric conditioner that will be an alternative fabric conditioner repellent - Have an alternative solution to prevent the different kind of diseases that mosquito brings especially dengue fever and not cause another problem. - Make use of the natural resources of our country to solve common problems caused by mosquitoes, especially dengue. - To have an alternative fabric conditioner repellent that will prevent different kind of diseases that mosquitoes bring especially dengue. HYPOTHESIS - The combination of oregano oil and Downy fabric conditioner will be a good alternative fabric conditioner repellent. SIGNIFICANCE OF THE STUDY - The importance of my project is that I'll able to combine the oregano oil and the Downy fabric...
