

Pollution due to diwali assignment

**ASSIGN
BUSTER**

Everyone's house would be lighted up with lamps & joy. Almost everyone loves celebrating Dalai. Though I'm an atheist, I also like this festival as it lights up the world. But along with bit happiness for the arrival of Dalai, I get lots of worry every year. Whatever you say, Dalai, along with bunch of other festivals & functions, are tagged with some key words – crackers, pollutions, global warming & noise. However we celebrate this Dalai; we can't remove these tags from the festival. Member last year had posted a post on why not to use crackers in Dalai other festivals. Do you remember that? It was ?? Is Dalai transforming from the festival of light & joy to the festival of pollution & destruction? : Dalai special. In that post, I had explained in details how firecracker, which is generally ignored as the cause of global warming, is affecting our climate & contributing to global warming. I don't know if you've stopped using cracker by reading that post. Or even if you've ever gone through it completely!!

But whether one ignores its bad effects or not, it'll certainly contribute to the roll climate change, & the unfortunate fact is that we can easily stop using crackers without any problem & reduce CO emission, but despite this, w?? re wasting millions on it every year without any meaning & hurting the planet. As the world is getting more & more educated & civilized, we're doing more & more meaningless & uncivilized works. Today, using cracker is becoming a fashion. Millions are spent on this worthless garbage stuff.

Bursting crackers is turning to a competition & a status indicator. Many people feel proud to show off their wealth by investing thousands or even lakes on this non-sense tuff. Though Vive used Dalai here as it's a major event in India when considerable amount of crackers are used, in almost

every event today, we wildly use crackers. I really don't understand why even educated persons do not understand the ill effects of global warming. Its a SHAME on our education. Many of you may think why I am behind crackers so much.

The reason is that crackers are something which, if we don't use, will not affect our daily lives anyway. It's nothing more than garbage. Then, why to use such a thing & hurt the entire planet & ourselves? It is estimated that the annual U. S. Carbon dioxide emissions from fireworks is 60, 340 tons or the same emissions from 1 2, 000 cars on the road for a year!! If one suggests that planting trees is a solution, then, please be informed that it'd take the entire lifetime of 5, 000 trees to offset the 60, 000 tons of carbon emissions produced in this one day!!

Not only it pollutes the environment, it also causes many deadly air-borne diseases. It releases carbon dioxide, carbon monoxide, sulfur dioxide to the atmosphere with serious health hazards. Despite knowing all these things, why to use crackers? As discussed in Is Dalai transforming from the festival of light & joy to the festival of pollution & destruction? : Dalai special, other sources of global warming are those which are important for our living or to fulfill our basic needs.

Most of the causes of global warming are energy producers without which we can't live. In fact, researches are going on on producing CEO-friendly energy sources. When we're uniting together to save this planet from global warming, then, why to put this garbage stuff in the equation? The only condition for using crackers is the CEO-friendly, carbon free, noiseless

crackers which don't affect us anyway. Still, it's economically a waste, as it gives only ashes, & its prices are soaring up.

However you describe the ill effects of crackers, every time you'd get something very bad or simply, Worst. Crackers are unnoticeable affecting all of us. We should understand what it's doing & how ITIL threaten our very existence in future. Governments should take it very seriously & should: ban the production of crackers enforce laws on its production, sales, use, & advertisement popularize he idea of not using crackers among public They're a lot of causes of global warming & pollution.

All the other sources are important for our living despite their ill effects. But cracker IS absolutely nothing more than garbage. Be smart, be civilized, use your knowledge, don't worry about what others think, don't care about society, & DON'T USE CRACKER. With all these, wish you all a happy Dalai. Celebrate Dalai & all the other festivals & events in CEO-friendly way without using crackers. Share this message with others & contribute towards a safer & healthier earth.
