

Global carbon black market

**ASSIGN
BUSTER**

Carbon black is a black powder manufactured by the partial combustion of fossil fuels and it includes variants such as furnace black, thermal black, lampblack, acetylene black, and channel black. Carbon black is used as a pigment and finds application as a reinforcing agent in rubber goods.

It is used in the plastic and automotive industries. Specialty carbon black is one of the segments of the Global Carbon Black market and it finds application in plastics, printing inks, and metallurgy. Covered in this Report

This report covers the present scenario and the growth prospects of the Global Carbon Black market for the period 2015-2019. To calculate the market size, the report considers the revenue generated from sales of carbon black across various industries and sectors.

To calculate the market size in terms of volume, the report considers the volume of carbon black consumed by various end-use sectors and industries. It also presents the vendor landscape and a corresponding detailed analysis of the top four vendors in the market. View our full TOC here
