Arthur Currie was born on December 5th 1875 in Adelaide Ontario. At the start of World War 1 Currie was a senior officer but was promoted because of his work well done in Ypres. In 1915-1916 he was promoted to charge of Canadian 1st division because of efforts there again he was told he was going to lead Canada in Vimy. He played a big part in leading and planning Canada's greatest battle victory ever. It is a key high point in France. Led by Arthur Currie and his Canadian army force. They attacked from April 9 to April 12th 1917 and captured it from the Germans. Canada's army did the impossible which neither could the British army do or the French.

With Arthur Currie's plan we took over it. We lost over 10000 soldiers which will never be forgotten for the efforts and bravery in taking over Vimy Ridge. This battle till this day is known as Canada's greatest success in battle. These soldiers are remembered to this day. Cluny Macpherson was a scientist and also a soldier that served for Canada. He was born in Newfoundland. It was created because of the attack on Ypres where Germany sent poisonous gas.

It was made out of cheap fabric and metal. It was used by soldiers to withstand mustard gas and chlorine gas. Was one of the first women in the acting force. She started her career by starring in her first movie in 1909 and then served in several more after that. She was born on 8th, April, 1892 here in Toronto Ontario. Her movie career moved her into the States where she really got her name. After that she lived there for the rest of her life in her residence in California and died on May, 29th, 1979 at the age of 87.

She was significant to Canadian because she was one of the first born Canadian actors and also one of the first woman to star in a moving film in

1927 5 different women- Nellie McClung, Irene Parlby, Louise McKinney, Emily Murphy and Henrietta Edwards asked the supreme court in Canada if the word person in section 24 of the Law book included women. They fought for several weeks in court but at the end The Canadian Supreme court decided the word person did not include or mean Women. The famous five were not done yet and took their case to London England. Which was Canada's highest court for appealing something. At this place they won the right for freedom for women. Now they were given permission to do what they want and work anywhere including men's jobs.

In 1921 a Canadian physician named Frederick Banting and a medical student named Charles Best were credited with the discovery of Insulin. They tested insulin in Dogs by injecting it in them and experimenting with the substance. This was invented at the university of Toronto. After they had perfected the substance and was ready for human use they tested it on 14 year old which was a success. Then in 1923 they were given a Nobel prize for their creation for the human race. They were the first quintuplets born in Canada. They were born in Ontario Canada on May 28th 1934. They were not respected and were taken by the Canadian Government and put in their very own amusement park which attracted tons of people around the world and slowly became a tourist attraction.

They were strictly given a schedule consisting of a sleeping time, playing and an eating time. Their faces were found all over products such as diapers and baby food. It was a journey in which over 1 thousand unemployed Canadian men who were put into camps to work for a very few amount of salary decided to protest.

On June, 3rd, 1935. They went on strike and travelled by train and truck. They went to protest poor conditions in the camp they were working in. Then they made their way to Ottawa there protest led to Bennett's new deal. The new deal promised better stuff for Canadian residents at that time.

Included health insurance and insurance to the unemployed. It was created by a man named Donald Munro who lived in Toronto Ontario. He had no money for his family so he made a table hockey with cheap materials such as wood. He was told to go to a local shop and show it to them as he did the shop workers were impressed and bought the game of him. Ever since there have been many people playing table sports games such as table hockey.

Over the years his idea got improved and then the game was finally perfected and not just made out of cheap wood lying around the home. He was born on February 1st, 1888 in Quebec. In 1949 Louis St Laurent became Prime minister his nickname is considered as Uncle Louis because of how he dealt with kids. He is known for bringing our latest province known as Newfoundland into Confederation. He is also responsible for making the St Lawrence seaway and building power stations around it. The construction of this almost rounded to 470 million dollars. He ran as prime minister for 8 years from 1949 to 1957.

He would die on July, 25th, 1973. Canada was given a crucial job in the invasion of D day. They were given their own beach to take over without any allied countries coming to the aid of Canada. There were 5 crucial beaches that they had to take over allied countries such as the United States and Britain each had their team on each beach.

Canada's duty was to take over Juno beach. On June, 6th, 1944 Canada started their attack on Juno and in 24 hours the mission was a success. We Canadians lost over 2500 soldiers and well over 10000 soldiers were injured. Professor Wilbur was a scientist who created the first Gsuit. He tested the problems of pilots and how they were struggling with gravity issues.

He came up with the idea in 1941 and started making it he had the idea of having the suit filled with water. But the later and better design came with using air inside of the suit instead of water. His suit was first used in an invasion in November 1942 and was a total success. He was born on July, 6th, 1907 in Calgary. At first he was an author, a soldier and a teacher. He was also given the job of lieutenant Governor of New Brunswick. He wrote a letter to the government officials telling them that the new Canadian flag should be used instantly and showed to everyone in Canada.

His design of the flag was one of the three final designs chosen as the best from the rest of the thousands of entries. Finally on December, 15, 1964 Canada's government finally adopted his flag as the new official flag of Canada. He would live a long life and die on September, 15th, 2002. The first Women prime minister of Canada was Kim Campbell.

At the time she was the leader of the conservative party and was standing for prime minister representing her party. Sadly she was only prime minister for a short period of time from June to November because people didn't like the idea of a female prime minister at that time and was forced out of the job. It was invented by Mike Lazaridis in 1999 at Waterloo Ontario. It included texting and calling with a plan but at first the phone never had many

functions but calling somebody. But still at that time the invention of the Blackberry was an drastic change in technology in the late 90s and the early 20th century as it was one of the first phones created by humankind here in Ontario waterloo by two students studying at the university of Waterloo.
