

Democracy as a  
member of parliament  
in 1995,

**ASSIGN  
BUSTER**

DEMOCRACY During Kikwete session there is democratically expansion because people were free to argue on government practices and all this show how the democracy is growing. And also free and fair election indicated that Tanzania are well developing democratically. Though there is some misunderstanding between parties example in Arusha but is not too great to frustrate the Tanzania democracy. So Tanzania is developing democratically from the period of Nyerere up to now days. SOCIAL SITUATION Police are those contributing to other social development that is because all leaders are selected to govern according to the political pillars of the party in ruling. So the social activities happened and these happening are according to the political situation. During Kikwete session most of the social services are improved for example each village supplied with dispensary and secondary schools which help to improve Tanzania health and help to meet MDGs in education and somehow on health of Tanzania. But that all come from political strength of Tanzania and implementation of political slogans as *Ari mpya Nguvu mpya na Kasi mpya*.

Generally politics of Tanzania are advancing that why there is security and development are seen from the independent time to now days. SESSION: 05 JOHN JOSEPH POMBE MAGUFULI John Pombe Joseph Magufuli (born 29 October 1959) is the President of Tanzania, in office since 2015. First elected as a Member of Parliament in 1995, he served in the Cabinet of Tanzania as Deputy Minister of Works from 1995 to 2000, Minister of Works from 2000 to 2006, Minister of Lands and Human Settlement from 2006 to 2008, Minister of Livestock and Fisheries from 2008 to 2010, and as Minister of Works for a second time from 2010 to 2015. 1 Mhe. Dkt.

John Pombe Joseph Magufuli 5th Incumbent Assumed office 5 November 2015 Running as the candidate of the ruling CCM, he won the October 2015 presidential election and was sworn in on 5 November 2015. In October 2015, Hon John Pombe Magufuli was elected as the fifth president of the United Republic of Tanzania. In his years of leadership the political situation has brought a series of changes in various sections. Economically there was economic expansion in the year 2016 in 7% and this expansion was maintained till 2017, the target of the President was to reorient public expenditure and to bring economic development that was through cutting of government expenditure and controlling tax exemptions, but in June 2017 the economy decreased from 1.9 billion to 1.5 billion and this is the situation of Tanzania's economy up to date. In this government the ongoing policy that drives the political system which is also introduced by Hon John Pombe Magufuli TANZANIA YA VIWANDA due to the political situation of Tanzania currently there is advancement of technology example the introduction of Dar es Salaam bus rapid transit which began its operations in May 2016 and the other forms of technology have improved since 2016 up to date.

On 12 April 2016 Magufuli conducted his first foreign visit to Rwanda where he met his Rwandan counterpart Paul Kagame and inaugurated the new bridge and one-stop border post at Rusumo. Magufuli also attended the memorial of the 22nd anniversary of the Rwandan genocide. In this government there is weakness most especially on the relationship between the leading party and other political parties which has thereby weakened the democracy of the country and also decreased peace in the country, currently there are political instabilities in the country due to politics example currently freedom

of speech in Tanzania is becoming a great problem since whenever people raise their voices regarding the government they tend to face negative outputs thus resulting to disturbance of peace within the country. Due to political situation of the country there have been improvements in the provision of social services most especially the transport system in large part of the country. On the other hand the union matters are becoming more complicated due to lack of understandings regarding union matters hence the nation is not politically stable hence there should be some amendment within the fifth government regarding political

situation. **CONCLUSION** Political situation of Tanzania since its independency up to date, political is still growing day by day due because there is free and fair election, there is freedom to everybody to choose any political party he/she is interested in order to elect the leaders. Generally the political situation of Tanzania are advancing from the time of independence up to now days because it started with socialist during Nyerere session whereby Tanganyika received help from socialist nations.

But during Ali Hassan Mwinyi session Tanzania changed to capitalist that why Mwinyi sometimes known as Mzee Rukhsa. Up to now days Tanzania still adopting capitalist as its ruling system, through those system adopted by Tanzania after independence to date are still providing to us security, social development, economic development as well as cultural development. In order to keep security and our developmental changes continue, we have to continue adopt this mode of ruling as it implemented by in last period after independence to date.
