17Phone Suite22 18Maintenance23 19Taking Care of your Device24 20After Services25 Safety 1. 1 Safety Precautions

Please read through the following briefings carefully, and act in accordance with these rules, so as to prevent causing any danger or violating any law.

Safe driving 1) Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit. 2) Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

Turn off during a flight: Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

Turn off the phone when within an area where blasting takes place: Be sure to strictly observe the related laws and statutes by turning off the phone when you are within, or in the vicinity of, an area where blasting takes place.

Turn off the phone when any dangerous goods are in vicinity: Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

In hospital: Please obey the related rules or bylaws of the hospital when using your phone in a hospital. Be sure to turn off your phone when near any medical equipment.

Your use of any wireless transmission equipment, inclusive of the phone, will interfere with any medical equipment that is not protected fully, and other electronic equipment items, too. Should you have any question in this regard, please consult a related physician or medical equipment supplier.

Interference: Each and every phone's performance may be affected due to radio interference. Professional service: The phone must be installed or repaired by no other personnel than professionals. You are likely to suffer a huge risk when you install or repair this phone by yourself, which also goes against the warranty rules.

Fittings and battery: You shall use the fittings and battery acknowledged by the phone manufacturer only. Using unauthorized accessories may tamper the warranty of the device. Emergency call: You may enter a telephone number (112, etc. ) to ask for emergency help after making sure that the phone has been turned on and is in the service status. Press the Send Key to call out. Disclaimer: Micromax will not bear any responsibility for any non-compliance with the above mentioned guidelines or improper usage of the mobile phone.

Micromax keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the mobile phone. In such a case, the latter shall govern. Introduction 1 Phone and Accessories Open the packing box of the phone and check that you have the Phone, Standard Charger, Standard Battery, USB cable, Earphone, Service Guide, Software CD, Leather pouch and Warranty Card. 2 To Lock/Unlock To unlock your phone (if auto keypad is enabled), press the small button on the top side of the phone.

Or to unlock the phone slide up on the message displayed on the screen. 4 Your Phone [pic][pic] 5 About your phone Micromax X560 is a complete

Touch phone. The main display of your phone is divided into 2 screens, slide your finger across the phone to change to the other screen to view more features. You can also change wallpapers by simply sliding your finger across the screen and choose from a wide range of interesting wallpapers. 6 About SIM Card and the Battery Please store the cards out of children's reach. The card and the contacts are vulnerable to damage due to scratching or bending.

Therefore, be careful when using, inserting or removing the cards. Be sure to switch off the phone before you insert or remove the battery or the card, otherwise, the phone may be damaged. Tips: The battery icon [pic] displayed on the screen indicates that the battery power is low. Please charge the battery. Please charge the battery before you use the newly purchased phone. We suggest you charge the battery for 4 hours continuously for the first time. Charging when the phone is in the ON mode will not influence the normal dialing and answering, but this needs to consume power, thus the time of charging will increase.

We suggest you recharge the battery when the power is used up so as to prolong the life of the battery. 7 To switch ON and OFF To switch ON: Long press End key when the phone is in the OFF mode. If the phone lock has been activated, you need to enter the 4-digit password to unlock. (The preset unlock code is 0000. ) If the SIM card has been inserted in the phone, and the related PIN code protection is activated, you need to enter the 4-8 digit password to unlock. Warning: If you enter three wrong PIN codes in a

row, the SIM card will be locked and you need to enter the PUK code to unlock.

Both the PIN code and PUK code are provided by the network operator. To switch OFF: In the standby mode, press the key on the top side of the phone to power on and off. Phonebook You can store names and phone numbers in the memory of the phone or SIM card. Menu > Phonebook 1 To Add a contact Menu> Phonebook> Options> New Or in idle, tap on the calling icon to enter phone numbers and save a contact. 2 To View a contact Menu> Phonebook> Options> View In the contact list of the Phonebook, select to view the required name card 3 To Call a contact Menu> Phonebook> Options> Call

View the contact number to make calls 4 To Edit a contact Menu> Phonebook> Options> edit Allows you to edit a contact 5 To Delete a contact Menu> Phonebook> Options> Delete Allows you to delete a contact 6 To Copy a contact to phone memory Menu> Phonebook> Options> Copy Copy the contact to the phone memory 7 To Move a contact Menu> Phonebook> Options> Move Move a contact from the phone to the SIM memory or vice-versa 8 Send a contact Menu> Phonebook> Options> Send contact Allows you to send a contact via message, MMS, email or Bluetooth 9 Add to Blacklist

Menu> Phonebook> Options> Add to blacklist Add the contact to the blacklist 10 Caller groups Menu > Phonebook > Options> Caller groups To view the ' caller groups' folder tap on the fourth key above- to select the group to be set in the preset groups mentioned in the phone. Like- Friends, family, colleagues, others and more. 11 Phonebook settings Menu >

Phonebook > Options> Phonebook settings • Choose phonebook view- Choose a location to save your contacts in • Speed dial- Choose numbers from your contact list and put them under the speed dial list • My number- View your number vCard version- View the vCard version • Extra numbers- View SIM1, SIM2 or SOS numbers • Phonebook backup- Allows you to import & export contacts to and from the phonebook. • Memory status-View the used and available phone & SIM memory • Copy contacts- Allows you to copy a contact from the phone to SIM memory and vice-versa • Move contacts- Allows you to move a contact from the phone to SIM memory and vice-versa • Delete all contacts- Delete all the contacts from SIM or phone memory

Calling Note: Once you attend a call your phone will display a series of functions from you to choose from.

For example- Mute, Send message, Hold call and more. Choose anyone feature to carry out the desired functions. 1 Call waiting Menu > Settings > Call settings> Call Waiting This function allows you to put the current call on hold and then answer a second one. If, during a call, a new call comes in, you will hear a special alert sound and the screen will display the number of the new incoming call, which indicates that a third-party call is coming in and waiting for to answer. 2 Call Barring Menu > Settings > Call settings > Call Barring

The function is a GSM network service and can restrict outgoing and incoming calls selectively. If you need to change the settings of Restrict Calls, please contact your network operator to obtain the password for opening this service. 3 Call divert Menu > Settings > Call settings> Call

divert With the Call Divert function (needs network support), you may divert incoming calls to another mobile phone or a direct line telephone, but not to any extensions of a fixed telephone. Call Logs 1 Missed calls/dialed calls/received calls/blocked calls

Allows you to save messages received in your inbox into this archive folder. 7 Delete Messages Menu> Messages> Delete messages Delete messages from the following folders: Inbox, Drafts, Outbox, Sent messages, Archive, All messages 8 Templates Menu> Messages> Templates> SMS Templates/MMS

Templates The phone has preset frequently used phrases which may be selected and added to the text when you are editing SMS. Preset phrases may be modified.

9 Message settings Menu> Messages> Messages settings SMS Settings Menu> Messages> Message settings> SMS settings Profile settings-

- Voicemail server
- Common settings- Set to receive Delivery reports, Reply path, Save Sent message.
- Memory status
- Preferred storage

MMS Settings Menu> Messages> Message settings> MMS settings

- Profiles- Select a profile from the available network profiles.
- Common setting- Select to compose, send, retrieve or view the memory status.

10 EMAIL E-Mail Before use, you need to set the e-mail in the “ E-mail accounts” menu. Via this menu, you can receive and send e-mail.

- Send and Receive: You can send/receive the e-mail from the specified mailbox.
- Write Email: You can edit e-mails.
- Inbox: You can see the received e-mails.
- Outbox: You can see the sent e-mails.
- Sent: You can view send e-mails.
- Drafts: You can see the drafts in the specified mailbox.
- Clear mailbox: You can clear the e-mails in the specified mailbox, including inbox, outbox, sent e-mail backup and drafts, or clear all e-mails.
- Delete marked emails: You can change the status of all e-mails to deleting status.
- Email accounts: You can set up you new account.
- Templates: you can pre-edit some common phrases, which is convenient for quick editing.
- Incoming Server: You can set the server parameters for the received e-mails, including Incoming server, Incoming port, user name and password etc.
- Signature: You can set it On or Off and edit the signature.

The first step in using email on your mobile phone is to define your email account’s settings so that your mobile phone knows which server to contact and to login using the correct credentials. TO CONFIGURE A

NEW EMAIL ACCOUNT: Go to: • Email > Email accounts> Options > New Account> Start to create account > Email address > Options > Next > Select email protocol ( ' POP3' or ' IMAP- as per the account settings). Next > Select Data account (as per the SIM connection) > Incoming Server (edit email incoming server as per the account standard settings). • Next > Outgoing Server (edit email outgoing server as per the account standard settings) > User Name > Password > Account Name > Options > Done (email account is created) • Go to- Created email account > Options > Edit (user can edit email account settings if required) • Advance Settings > Outgoing Sever > Outgoing Port (Input correct outgoing port according to the email configuration). Advance Settings > Incoming Server > Incoming Port (Input correct incoming port according to the email configuration) • Go to- Configured email account > Options > Activate Your email account is now created!

11 Broadcast Message Menu > Messages > Broadcast Message The phone supports Broadcast Message. It is supported by GSM network. Broadcast messages are single-way messages sent to the users of the network operators by the message service center. For the contents and channel setup of broadcast messages, consult your network operator.

It also allows you to connect to Snaptu, Nimbuzz and Operamini as well. Java settings Menu > Connectivity> JAVA settings STK 1 STK Services

If your SIM card supports STK, you may use the corresponding value-added services. Inputting Text You can enter text in English and digit. Phone Suite Connect your phone and PC via the USB cable> Select COM Port PhoneSuite provides various functionalities for users to manage the documents in their mobile phone easily on a PC. It will communicate with mobile phone via serialcommunication or Bluetooth. • Phonebook is used to manage the contacts information between the mobile phone and the PC folder. In addition to adding, editing and deleting contacts, users can get a backup of the phonebook database on the PC folder • Message helps users to read, edit and send SMS/EMS messages directly from PC. Besides, you can create personal folders to categorize all messages on the PC side. • Settings: contains the system-related settings and message default settings. Users also can set whether they want to import contact list from other software or not here. • Images: is used to draw images of various file types, and transport the images between the PC and mobile phone. It also provides clip, mirror and rotate functions to reach user's expectation. • Melody: provides a

easier way to compose your own melody through the staff graphic interface. It also provides the functions to transport the melodies between PC and mobile phone. MMS Message: helps users to read, edit MMS messages directly from PC. Users also can transport MMS messages between PC and mobile phone. • File Manager provides a friendly interface for users to manage their files between the PC and the mobile phone. Functionalities of "copy", "paste", "delete", "rename" and "new folder" are provided in the out tool. Besides, File Manager also supports local java installation from PC side. Maintenance Use a dry soft cloth to wipe general dirt. Do not use a hard cloth, benzene or thinner to wipe the phone, otherwise, the surface of the phone will be scratched or could even result in the fading of color. Taking Care of your Device Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone: • Always keep the small parts of the phone away from children. • Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it. • Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged. • Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries. Do not attempt to open the device other than as instructed in this guide. • Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics. • Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft,
