

Good example of public transportation: benefits for the 21st century essay

[Transportation](#), [Public Transport](#)

A new century is the time of globalization and modern technologies.

Nowadays travelling is one of the most widespread interests, people like and have the opportunity to travel all over the world, it's a new lifestyle that needs modern ways of transportation. Public transportation executes different major functions; this branch is very important nowadays.

Time is the main factor that has huge value in the modern active world. It is vital to spend less time to go for work, school or hospital for all segments of the population, because time is money, and every minute has its value in our life. No wonder that such characteristics as convenience, quality, availability of the remote areas and speed of public transport are the integral part of this sphere. Everyday people who live in dormitory arias and suburbs go to work and well adjusted transport network helps to reach the place in the shortest period. This benefit is one of the most important and burning conditions in distant districts of the city. Moreover everyday children go to school, and their parents need to have reliability guarantee that children will reach the place SingularguaranteePluralguaranteessafely and in time. Seniors go to hospitals, parks and economic centers; they have no opportunity to drive themselves, that is why transportation is vital for this people.
