A corrigendum on

[Inflammatory Cytokines and BDNF Response to High-Intensity Intermittent Exercise: Effect the Exercise Volume](#)

by Cabral-Santos, C., Castrillón, C. I. M., Miranda, R. A. T., Monteiro, P. A., Inoue, D. S., Campos, E. Z., et al. (2016). Front. Physiol. 7: 509. doi: [10.3389/fphys.2016.00509](#)

In the “ Abstract” Section, there was a mistake in the BDNF-values of the HIIE1. 25, once the values of the standard deviation were spliced and did not contain the comma. HIIE1. 25: 9. 71 ± 306 is incorrect, the correct value is HIIE1. 25: 9. 71 ± 3. 06.

In the last sentence of the “ Abstract”, the word “ duration” was misspelled as “ durantion”.

In the “ Results” Section, the last word of the first paragraph there is an error in spelling the wordduration, appears as duation.

Finally, in the “ Discussion” Section, the last sentence of the fourth paragraph has been modified from: “ However, after 60-min, the IL-10 levels had returned to baseline values in both protocols.” to “ However, after 60-min, the IL-10 levels had returned to baseline valuesonly in HIIE1. 25 km protocol.”

The authors apologize for these errors. These do not change the scientific conclusions of the article in any way.
